ALEX MORGAN

alex.morgan@example.com | Lagos, Nigeria | github.com/alexmorgan

SUMMARY

Backend engineer with five years building Python services for payment and logistics teams. Comfortable owning a service from design to on-call.

EXPERIENCE

Senior Backend Engineer | Northwind Logistics | 03/2022 - Present

- Built a FastAPI rating service that handles 40,000 shipments an hour.
- Led the billing migration to Postgres and cut reconciliation errors by 30 percent.
- Mentored three engineers and introduced a weekly design review.
- Cut p95 rating latency from 900 ms to 120 ms by caching tariff lookups.
- Wrote the incident runbook that the on-call rotation now uses.

Backend Engineer | Kestrel Payments | 07/2019 - 02/2022

- Implemented idempotent payment webhooks handling 1.2 million events a month.
- Added tracing and structured logging that cut incident diagnosis to 15 minutes.
- Paired with the fraud team to add velocity checks before settlement.

Junior Developer | Adept Systems | 08/2017 - 06/2019

- Maintained a Django inventory tool for twelve retail branches.
- Wrote the first automated test suite for the reporting module.

EDUCATION

BSc Computer Science | University of Lagos | 09/2015 - 06/2019

- Final year project: a timetable scheduler used by two departments.

SKILLS

Languages: Python, TypeScript, SQL
Frameworks: FastAPI, Django, React
Infrastructure: Postgres, Redis, Docker, AWS

PROJECTS

Route Planner | 2024

- Built a route planner with OSRM and FastAPI, serving 200 queries a day.
